

## HOW TO CREATE A LAB

LABS are a group of colleagues working together and analyzing data under a specific Principal Investigator (PI):

1. Click on LABS in the top banner
2. Click on Create New Lab
3. Fill in Lab Details (you can email us to add your institutions; click FEEDBACK)
4. INVITE Users by searching by name or email address.
5. Save the Lab

6. You can edit the settings of the lab by clicking the setting icon.
7. You can manage you pending RSVPs (people you have invited to your lab) and accept/deny requests to join your lab(s)
8. Click on Manage Individuals to add individual (patient) data
9. Click on Manage Members to change their roles and to invite other users including non-Genesis users via email
